## **At HIMSS11 Integrated Modular Systems Presents New Paperless Voice Solution Interactive with RIS and PACS and Universal Worklist**

**Havertown, PA and Naperville, IL – February 16, 2011** – Integrated Modular Systems, Inc. (IMSI), a leading integrator of medical imaging and healthcare technology solutions, and Grundig Business Systems (GBS), one of the world's leading providers of professional dictation systems, will be presenting a new IMSI voice product in combination with a GBS microphone at HIMSS Conference and Exhibition from February 20 through February 24, 2011, at the Orange County Convention Center in Orlando, FL. Recognized as one of the premier conferences in the healthcare industry, HIMSS11 brings together healthcare professionals from across the globe for this annual gathering. Integrated Modular Systems, Inc. will be showcasing imsiVOICE-Interactive™ on the HIMSS exhibit floor in booth # 2886. imsiVOICE-Interactive is not just integrated and interoperable, but also interactive, providing a “single click” interactive interface to imsiRIS-X2 and imsiPACS, or other vendors' RIS and PACS products, coordinating the radiologist with OneList™, the universal PACS worklist, and launching windows for medical images, and previous history. Reports are produced using voice recognition, such as Dragon Naturally Speaking®, or transcription accessing hosted voice files, and automatically transmitted to RIS, HIS, EMR, and to fax and email services. Also featured is the Grundig Business Systems Digta CordEx wireless professional microphone. The Digta CordEx allows users to move freely within a 25-foot radius. A visual and audible warning is given when a user moves out of range, while the dictation is simultaneously saved in the device's temporary memory ensuring that the physician will not lose a single moment of their dictation if they move out of range.

“imsiVoice-Interactive has taken our reading room paperless, and the effect has been more dramatic than we ever expected. Our radiologists are now finishing their case loads as much as

an hour and half earlier every day. The radiologists love the system and particularly that they are able to get all of this functionality with the freedom of a wireless microphone, and the Grundig software gives them all the features they demand”, observes Mark Jundanian, M.D., Chairman, Medical Imaging Department, Saint Anthony Hospital, Chicago, IL.

#### **About Integrated Modular Systems Inc.**

Integrated Modular Systems Inc. (IMSI) is a leading integrator of medical imaging and healthcare technology solutions. For over 30 years IMSI has been engineering, installing, customizing and supporting healthcare technology solutions to meet the individual needs of clients across the US. With expertise in web-based products, HL7, and DICOM conformance, IMSI offers a continuum of PACS and teleradiology products and services. IMSI works with corporate partners in the industry to design and bring to market the most technologically advanced solutions. IMSI concentrates on the needs of clients, so they can stay focused on their patients’ diagnostic images. Find out more about IMSI on the internet at [www.imsimed.com](http://www.imsimed.com).

#### **About Grundig Business Systems GmbH**

With more than four million dictation systems sold and over 50 years of experience, Grundig Business Systems GmbH (GBS) is one of the world’s leading manufacturers of professional dictation systems. It is the only company in the professional dictation industry to develop and produce its cutting-edge products in Germany. GBS products are distinguished by technical innovation, quality, and top-notch design. Whether for doing mobile dictation on the go, with a microphone at the PC, or for making conference recordings, dictation solutions from GBS are on the scene every day, helping attorneys, physicians, companies, and many others to get their work done efficiently and cost-effectively. The independent company, formerly attached to the parent company Grundig, was named one of the top 100 most innovative medium-sized companies by the Vienna University of Economics and Business. In addition to numerous awards for distinguished product design, GBS received the “IT Innovation Prize 2009” for the world’s first wireless dictation microphone for professional use, the Digta CordEx, by the “Initiative Mittlestand” (an initiative for medium-sized businesses).. GBS’ North American Headquarters are in Naperville, IL. Find out more about GBS on the internet at [www.grundig-gbs.com](http://www.grundig-gbs.com).
