

INTEGRATED MODULAR SYSTEMS INC.

Experience

IMSI has been providing medical imaging information management solutions to facilities for over 30 years.

Customization

IMSI provides solutions tailored to our clients needs.

Expertise

Our years of experience affords us a flexible approach when designing and implementing systems.

Integration

All IMSI products integrate seamlessly with any HL7 or DICOM compliant PACS, RIS, HIS, PMS or EMR system.

History

The business began in 1977 under founder and CEO John Mazur. John developed several hospital systems, including radiology department systems, while working as a software developer and systems analyst in the healthcare market.

With vast experience in multi-facility healthcare organizations, he has helped clients to adopt electronic patient records, digital imaging, and PACS. The business name was changed to Integrated Modular Systems Inc. (IMSI) in 1999 to reflect the company's comprehensive and flexible approach to designing, installing, customizing, and supporting healthcare technology system solutions.

IMSI has expanded its customer base to medical organizations across the United States. Client organizations vary from large, urban hospitals to rural, single-specialty practices. In 2002, the company opened an office in Chicago to serve its growing customer base in the Midwest.

Focus

IMSI is a leading integrator of medical imaging and healthcare technology solutions. For over 30 years IMSI has been engineering, installing, customizing and supporting healthcare technology solutions to meet the individual needs of clients.

With expertise in web-based products, HL7, and DICOM conformance, IMSI offers a continuum of PACS and teleradiology products and services.

IMSI continually works with corporate partners in the industry to design and bring to market the most up-to-date and technologically advanced solutions.

Specializing in providing customized solutions to every client, while utilizing standard PCs, software and hardware, IMSI concentrates on the needs of clients, so they can stay focused on their patients' diagnostic images.

Clients Projects

Integrated Radiology Information System installed in hospitals nationwide

PACS/Teleradiology Systems installed nationwide

ImageWebGate™ for Hosted Image Management, Viewing, Resulting, and Archiving

Mammography Care Tracking System installed at hospitals

HL7 Compliant Interfaces

DICOM Worklist

Surgeons Notes Reporting System with Voice Recognition

CD/DVD Imaging Recording

Xray Film Digitizing

Your Complete Medical Imaging Information Systems Solutions Provider
